Multiple and Single Subject Lesson Plan Template (Teaching/Co)

Alliant International University California School of Education

General Educator (Candidate) Name:	Stephanie Sorensen 2036847	**Special Educator Name**:	EdD Cathrine Bartlett
Course/Progress Assessment :	Clinical Practice III	**Date:**	1/19/2026

GRADE LEVEL	9th-12th
SUBJECT/CONTENT	Art 3D Design
TITLE OF LESSON/FRAMEWORK	Repousse and Chasing: Embossing
THE CALIFORNIA TEACHING PERFORMANCE EXPECTATIONS	TPE 1: Engaging and Supporting All Students in Learning TPE 2: Creating and Maintaining Effective Environments for Student Learning TPE 3: Understanding and Organizing Subject Matter for Student Learning TPE 4: Planning Instruction and Designing Learning Experiences for All Students TPE 5: Assessing Student Learning TPE 6: Developing as a Professional Educator
ESTABLISH ENVIRONMENT TPE 2; TPE 5	There are 30 students in a self-contained classroom with a patio, two closets, one of which is a jack and jill closet. The school is in a mid-to-high-level, socio-economic community. It is the beginning of the year with a wide range of diverse learners and grade levels ranging from 9th -12th grades. The classroom culture has supportive students and is encouraging to the diverse learner. Students enjoy the classroom environment and like to socialize with each other. There are some students with a Specific Learning Disability, 504 or IEPs. There are two bridging ELL students. Lecture using a slideshow and any demonstrations will be taught and discussed inside of class prior to moving on. The focal point of the lesson will be emphasized more than once so students can understand the purpose of the lesson and the relation to the assignments. Students can view lectures and recorded demonstrations on Chromebooks for review. Students will have access to other students during studio time to discuss further. Projects are turned in with an online photo, along with an artist statement and critique. Summative assessments will be recorded in Google Classroom and then into Aeries. Collaboration will be encouraged prior to summitting assignments so students can practice their skills of positively critiquing.
APPLICATION OF THEORY How is Theory applied in this lesson? TPE 6	The two theories employed in this lesson plan are progressivism and humanism. Progressivism asserts that people are “born with unlimited potential for growth in a nurturing environment.” (Lange, 2006. p.97). Therefore, teachers are to facilitate an environment for growth and learning using UDL in lesson preparations. The role of a teacher is inclusion and mentorship, regardless of grades and social standing. The teacher is more of a mentor and a coach, facilitating discussions and self-discovery through studio time. The practice of the teacher is to get students to take ownership of their personal knowledge, their value of education, and their personal growth. The teacher will do this by informal assessments throughout studio time where students have a voice and teacher provides input on their focus and how to further develop their work. The humanist philosophy approach encourages responsible choices and self-discovery so “that individuals would strive to better themselves and their world.” (Conrad & Openo, 2018. p. 40). A teacher can facilitate how students learn but not the value of education to each student. Facilitating an environment with inclusion and passion gives students motivation driven through self-accountability. Through the humanist philosophy a student's responsibility, accountability and freedom go hand in hand with how a student learns and the role of the

	student. The teacher will provide students self–assessments so they can gauge their progress. Peer study and positive feedback increase understanding of assignments and can create a positive environment. A study posted in the International Journal of Science & Mathematics Education. Dec. 2020, found, "most students experienced some benefits of peer assessment, even if they did not put effort into their own work or receive constructive feedback." (Ketonen, et. al., 2020, p. 1).

CA COMMON CORE/ISTE/State Standards for Students
NCAS: CREATING VA:Cr2.1.6a Demonstrate openness in trying new ideas, materials, methods, and approaches in making works of art and design.
MEASURABLE OBJECTIVE: What will your students be able to do? TPE 1
Students will be able to identify academic language for repousse and embossing through the process of fill in the blank notes. Students will be creating 2 of our own 3"x3" sample practice pieces. One sample will be quartered with 4 different textures. The second sample is of an image portraying textural contrast.
ASSESSMENT **Check for Understanding: Formal and Informal** How will you know whether your students have made progress toward the objective? How and when will you assess mastery?
Formative Assessment: Fill in the blank notes. Formative Check: Students will list make 4 thumbnails of their image sample idea prior to beginning their sample. There will be an informal formative assessment to access and go over their texture sample. Summative Assessment: Students will turn in a photo of their 2 samples and submit it into google classroom.
DIVERSE LEARNERS 1. How will your instruction support the diversity of learners in your classroom? 2. List the specific strategies you will use to meet the needs of all identified learners TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6.
TPE 1: Engaging and Supporting All Students in Learning: Allow options for various levels of Art skills. Show examples of artwork for students to better understand the assignment. Students will have a choice in how the assignment is executed, which will allow them to simply the assignment. *TPE 2: Creating and Maintaining Effective Environments for Student Learning:* Table groups with accessible supplies around the classroom. Provide time for previously absent students so additional instruction can be given when time allows, otherwise have them check Google Classroom for class slides and further assignment information. *TPE 3: Understanding and Organizing Subject Matter for Student Learning:* Slideshow to introduce the lesson. Students will have access to slides and assignments in Google Classroom. *TPE 4: Planning Instruction and Designing Learning Experiences for All Students:* Start with slideshow of images and important information. Explain assignment and have class repeat instructions out loud when necessary. Formulate class time so each class session or lesson is lecture, sample, instruction, assignment/project, review. This allows students to understand the pacing of each lesson and project.

Multiple and Single Subject Lesson Plan Template (Teaching/Co)

Alliant International University California School of Education

TPE 5: Assessing Student Learning: Use formative assessments throughout the learning process. The teacher reviews students' work in table groups. The teacher should strive to say one positive thing at each table and inquire about students' work. Provide constructive feedback as needed. Simple check marks will be given as students hit certain marks, exit tickets, within the project.
TPE 6: Developing as a Professional Educator: Reflect and assess the amount of time teaching as well as the amount of time needed to complete the assignment. Look for easier ways to explain the art, the process, the project. Collaborate with other Art teachers. Work with Councilors and Aides when available. Check in with EL students and assess their understanding.
TPE 7: Effective Literacy Instructions for All Students: Academic discourse is used throughout the lesson. Syntax is used during discussions, lectures and formative assessments. Guide students in academic discourse. The students will be supported by using correct vocabulary as the teacher reiterates what a student has said using syntax and academic language.
(CTC, 2025)

DIFFERENTIATION

- Differentiated instruction is not the same as individualized instruction.
- Differentiation allows students to show what they know in different ways.

TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6

1. Content	2. Process/Implementation	3. Product/Measure
Mention/incorporate Differentiated Instruction Verbal, visual and practical for diverse learners Lesson scaffolds to provide a base for all learners including EL students to understand. This is done through slideshow done alongside a verbal lecture. Students are to take notes. Diverse learners can take notes using fill in the blank page of notes.	Post slides and assignments onto Google Classroom so all students can review the lesson and assignments. Allow all students to participate in their own capacity and in any group that they are comfortable in joining. Take Fill-in-the-blank notes. Student who request static notes in their IEPs receive notes already filled out.	Fill in the blank notes will be used during the lecture. Accommodations are made in that students do not need to turn this in until it is completed, allowing diverse learners such as EL students and those with dyslexia to succeed. Lecture is posted onto Google Classroom for further reference. Literacy Formative Assessment: An Exit Ticket will be done by each student. Accommodation is made in that students can submit an audio response for each question or come see the teacher. Summative Assessment is submitting a photo/slide of the completed sample into Google Classroom. Accommodation could be a physical check and scoring on the spot.

CLASSROOM MANAGEMENT TPE 2	
How will you create a healthy learning environment?	Students will have assigned numbered/shape seats at each color table. I will welcome students quietly into their seats. Class will open with a breathing exercise and a question of the day. This will provide a common tone and community feel within the classroom. I will have music quietly playing during studio time if needed. I will have room for an aide to sit next to students who need one-on-one attention if applicable to the particular class period. I will stop by and check in with ELL

	students and make sure they understand the assignment or have another student near them check in with them and update me as things progress in a busy classroom.
How will you create and maintain a supportive and safe learning environment?	As students demonstrate correct behavior and protocols, through their understanding of the code of conduct contract done by them at the beginning of the year. I will focus on positive reinforcement and remind corrective behavior as a class and avoid calling out individual students for minor things. At the beginning of class we will start with 60 Seconds and Good things to bring calmness to the class at the very beginning. This will be followed by 1 minute of discussion bringing a sense of community and belonging.
How will you establish a climate of learning?	Explaining how things should be done prior to each project is a positive reminder to the class and will eliminate a large portion of confusion and correction. With students who struggle in the classroom I will catch and praise small positive behaviors and send praise home to parents via email or phone call. Striving to start the year off positively will go a lot farther if or when something arises. When behavioral corrections need to be made, I will refer to the class contract quietly to individuals or as a class without calling out individuals. I will check in with students both in their projects and take interest in how they are doing, especially when approaching disengaged or problematic students.

OPENING (10 minutes – suggested) TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6	
How will you communicate *what* is about to happen? How will you communicate *how* it will happen?	The teacher is to have a slide show posted on television. With a "One Good Thing" question in relation to the lesson discussion. This will segway into the lesson.
How will you communicate its *importance*? How will you communicate *connections* to previous & future lessons?	The teacher will connect the "One Good Thing" question as she opens into the lesson. This is an introduction to Repousse, so students should not be expected to connect to previous lessons in terms of technique. However academic language used and should be reminded and emphasized. Students will see examples and academic language will be used during the lesson.
How will you engage students and capture their interest?	The teacher will lead this discussion with a slideshow and some videos on the history the history. Use the basic academic language for Repousse when describing each historical piece shown in the slideshow.
CO-TEACHING APPROACH	☐ One Teach, One Support, Parallel, Alternative, and Station *(select if applicable)*
• *TIME*	5 minutes
• *TEACHER*	Begin slides with 6o Second and Good Things.
• *STUDENTS*	Students do a short breathing exercise and then do a short discussion on an opening question that leads into the lecture.
• *MATERIALS, STRATEGIES, & TECHNOLOGIES USED*	21st Century Skills (Technology & Informational Literacy) Computer, television, slides

INTRODUCTION OF NEW MATERIAL (10 minutes – suggested) TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6	
How will you introduce academic language?	Academic language will be used during the opening of class as well as the introduction of new material. They will be told that they need to use the academic words that they will be practicing in an Exit Ticket. Previous examples of academic language will be used by the teacher during the opening lecture of class.

Multiple and Single Subject Lesson Plan Template (Teaching/Co)

Alliant International University California School of Education

What key points will you emphasize and reiterate?	Be sure to emphasis the techniques required during the lesson and point out the vocabulary specifically during lecture.
How will you ensure that students actively take-in information?	Students will be actively engaged in this UDL lesson; brainstorming, sketching thumbnails and creating a sample project.
How will you vary your approach to make information accessible to all students? How will you differentiate your instruction for all your learners?	Exit tickets can be done written or an accommodation of speaking to me verbally will work. This lesson had broad requirements so students have choice in what they choose to do for their sample.
Which potential misunderstandings will you anticipate?	The difference in chasing and repousse.
Why will students be engaged and interested?	Students will be engaged as they listen to what they are about to accomplish for the lesson.
CO-TEACHING APPROACH	☐ One Teach, One Support, Parallel, Alternative, and Station *(select if applicable)*
• *TIME*	20 minutes
• *TEACHER*	Lecture, slides
• *STUDENTS*	Students are taking notes and listening to lecture and video, Finish with an Exit Ticket on vocabulary
• *MATERIALS, STRATEGIES, & TECHNOLOGIES USED*	21st Century Skills (Technology & Informational Literacy) television, slides

GUIDED PRACTICE (15 minutes – suggested) TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6	
How will you clearly state and model behavioral expectations?	The teacher will have a sample of the completed assignment from previous years and review the various parts of the assignment. The teacher will announce that she will come around and do formative checks before they do they own sample. The teacher will do a demonstration.
How will you integrate the academic language?	During the demonstration the teacher will use the correct academic language throughout the process.
How will you ensure that all students have multiple opportunities to practice?	Students will be able to see a demonstration live and then practice for themselves during Studio time.
How will you scaffold practice exercises from easy to hard?	By implementing Bloom's taxonomy: Students start off by understanding during lecture, analyze and evaluate their ideas and techniques during assessments and finally create a sculpture.
How will you monitor and correct student performance?	Independent and guided practice is a great time for the teacher to make rounds around the room to ensure understanding and add additional insight to students.
Why will students be engaged and interested?	By scaffolding the lesson in this way students can Know, Understand and Do (KUD). This keeps students engaged and help them find success in their learning. This is done with lecture, exit ticket, brainstorming and practice.
CO-TEACHING APPROACH	☐ One Teach, One Support, Parallel, Alternative, and Station *(select if applicable)*
• *TIME*	10 minutes
• *TEACHER*	Presenting todays assignment and demonstration
• *STUDENTS*	Students are listening, asking questions
• *MATERIALS, STRATEGIES, & TECHNOLOGIES USED*	21st Century Skills (Technology & Informational Literacy) Aluminum, tooling tools, paper cutter, ball point pens, rag or newspapers or magazine.

Multiple and Single Subject Lesson Plan Template (Teaching/Co)

Alliant International University California School of Education

INDEPENDENT PRACTICE (25 minutes – suggested) TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6	
How will you clearly state and model behavioral expectations?	This will be done during guided practice and visuals samples in the slides. Students will be guided on how to exactly accomplish their project.
How will students demonstrate an understanding of the academic language?	Students will demonstrate understanding of academic terms with a repousse exit ticket after the slideshow.
In what ways will students attempt to demonstrate independent mastery of the objective?	Independent mastery will be done through the completion of their sample project and written mastery is done through their exit ticket.
How will you provide opportunities for extension?	Students can come in during Flex Time to continue working when extended time is needed.
Why will students be engaged and interested?	Students will be engaged and interested as they learn a new art medium and get to explore its technique.
CO-TEACHING APPROACH	☐ One Teach, One Support, Parallel, Alternative, and Station *(select if applicable)*
• *TIME*	30 minutes
• *TEACHER*	Suggesting and guiding students to elevate their work and stay on task. Also making sure all students have had a chance to complete exit tickets along the way.
• *STUDENTS*	Brainstorming, sketching thumbnails, completing exit ticket prior to repousse sample, tooling repousse sample
• *MATERIALS, STRATEGIES, & TECHNOLOGIES USED*	21st Century Skills (Technology & Informational Literacy) Aluminum, tooling tools, paper cutter, ball point pens, rag or newspapers or magazine.

CLOSING (5 minutes – suggested) TPE 1; TPE 2; TPE 3; TPE 4; TPE 5; TPE 6	
How will students summarize what they learned?	Students will summarize what they have learned through the completion of their repousse sample.
How will students be asked to state the significance of what they learned?	This is done by meeting the criteria of their sample assignment. A summative assessment will ultimately be done at the end of the unit with the final project being completed.
How will you provide all students with opportunities to demonstrate mastery of or progress toward the objective?	This is done throughout the lesson through exit tickets and by meeting the criteria of their sample assignment.
CO-TEACHING APPROACH	☐ One Teach, One Support, Parallel, Alternative, and Station *(select if applicable)*
• *TIME*	10 minutes
• *TEACHER*	Announce and remind students to submit work onto google classroom before the end of the period.
• *STUDENTS*	Will submit samples to google classroom and have time to clean up.
• *MATERIALS, STRATEGIES, & TECHNOLOGIES USED*	21st Century Skills (Technology & Informational Literacy) Camera and google classroom

OUTSIDE THE CLASSROOM ENVIRONMENT (if appropriate). How will students practice what they learned?
No homework. Students will be able to practice what they have learned in future assignments in this unit.
COLLABORATION What other education professionals will you collaborate with to ensure all learner needs are met?
Councilors will collaborate through 504 and IEP plans. No other educational professionals need to collaborate in this lesson.

Multiple and Single Subject Lesson Plan Template (Teaching/Co)

Alliant International University California School of Education

REFLECT ON INSTRUCTION (DATA-DRIVEN)	
Pre-Teaching Lesson (Expectations) This lesson focuses on the B-D-A framework. This lesson really incorporated the Before and During aspects of this lesson and brought diverse learners to the same basic understanding before moving on to the project and assessments. By taking the time to provide a background into the lesson and coupling that with repousse techniques, students are provided further engagement into what is being taught and "they exhibit an 'inherent passion' for what is being learned." (Vacca, Vacca, & Mraz, 2017, p. 152).	**Post-Teaching Lesson (Delivery)** This lesson addresses the need for class activities. In the Teachings in Education video (2022), it discusses four areas that can apply to student activities. Engagement, active learning, collaboration and student autonomy. This lesson provides all four of these experiences. Being taught through various meanings brings depth into their learning experiences. I believe the delivery of using Cooperative Learning Model will keep students excited and engaged the entire week this lesson is taught. (Teaching in Education, 2017).

PROFESSIONAL TEACHING STANDARDS REFLECTION

InTASC: Of the InTASC standards identified as being supported by this lesson, rate your performance:

- Does Not Meet

- Developing
- Effective

*Note. This is an opportunity for you to identify areas for development. It is important to be honest in your reflection so you know what areas to strengthen.

The implementation of InTASC Standards is developing in this lesson. These standards are found under the Standards section of this lesson and are set up to be effective in this lesson and in the class structure. However, this lesson was not taught yet and so they have not been implemented to know how effective the lesson is. Below are the Standards that are implemented into four general categories: The Learner and the Learning, Content, Instructional Practice, and Professional Responsibility.
Students are supported by these four main categories:
The Learner and Learning; Teacher implements various ways of learning for all students to develop individually in various ways; social, emotional, cognitive, linguistical and physical ways. Implements developmentally appropriate experiences. Teacher lessons are geared toward critical thinking and exploration. This is done through various types of learning; through lectures, slideshows, group discussions, projects and reflection/critique assignments.
Content Knowledge; Teacher uses lectures coupled with slideshows, notes, group assignment and exit tickets. This combination allows students to connect, think critically, creatively, and collaborate.
Instructional Practice; Teacher uses various forms of teaching for the diverse learner and plans instruction to support each students individually. Adjusted handouts, fill in the blank notes, collaborating during studio time. Assessments are done through an exit ticket, group project participation, and completion of an assignment turned in through Google Classroom.
Professional Responsibility: Teacher engages in consist efforts of Professional Development. Does self and class evaluations along with adjustments to practices when needed. The teacher takes responsibility for students and community members to ensure growth and advancement in their profession. This is done not only through class time but through the development as a teacher. This entails ongoing self-reflection and class reflection. Each lesson always has room to develop and grow. Reflection is an important step in this practice.
(CCSSO, 2018)

ISTE Standards for Teachers: Of the ISTE standards identified as being supported by this lesson, rate your performance:

- Does Not Meet
- Developing
- Effective

*Note. This is an opportunity for you to identify areas for development. It is important to be honest in your reflection so you know what areas to strengthen.

The implementation of ISTE Standards is developing in this lesson. The implementation of tech is implemented through an Google Slides and compiled using Google Classroom. Chromebooks are an additional aid for those students that need it during independent practice.
ISTE 1.1 Empowered Learner; Uses previous knowledge of the world around them and is introduced to a common foundation of understanding at the beginning of the lesson. Students can revisit the slideshows and possible demos on a Chromebook during class studio time and on their own time. Students are to demonstrate their work in person or on Google Classroom. Feedback is provided via Google Classroom.
ISTE 1.2 Digital Citizen; Uses digital safeguards and etiquette while online. Class time will be intentional when it is okay to pull out phones. Students will use phones during appropriate times to do research online and to also submit photos of completed work. If a student isn't using tech on their phone appropriately, they will be directed to a Chromebook.
ISTE 1.3.d Knowledge Constructor; Uses previous knowledge of the world around them and find a common foundation at the beginning of the lesson. Scaffolding will be in the slides and any assignments will be submitted in Google Classroom.
ISTE 1.4 Innovative Designer; Uses parameters to execute an open-ended lesson allowing perseverance in an open-ended problem/ project. This is mainly exhibited in groups or with assessments. An alternative is for students to participate in groups or present is to submit commentary via video or audio for discussion points. This will be submitted into Google Classroom.
ISTE 1.5.c Computational Thinker; Break problems into chunks while highlighting key information learned. Use what was observed and learned to make their own project. Employ understanding of strategies to be developed further by experimenting

with their project. This is done through reflection and assessments. Students can use an online format of the handouts or questionnaires, turning them in on the Google Classroom platform.
ISTE 1.6.b Original and Remixed Works; Have students make up their own images and list of ideas. Have students decide as a group on the image ideas created. Students are encouraged to use academic language to support their idea on how to execute the project. Students can submit their work and ideas in person or through Google Classroom.
(ISTE, 2024)

TPE's: Of the TPE's identified as being supported by this lesson, rate your performance:

- Does Not Meet
- Developing
- Effective

*Note. This is an opportunity for you to identify areas for development. Being honest in your reflection is important so you know what areas to strengthen.

The implementation of TPE Standards is developing in this lesson. These standards have been addressed in this lesson plan under the Diverse Learner section of this lesson. The lesson is set up for all students to meet the objectives; however, this lesson has not been implemented to know. Therefore, the standard is still developing. The TPE's identified are below:
TPE 1: Engaging and Supporting All Students in Learning: Allow options for various levels of Art skills. Show examples of artwork for students to better understand the assignment, use modified handouts, tools or mediums. Assign the project to be broad so students can have a choice in how the assignment is executed. Simplify where needed so students can execute the same assignment.
TPE 2: Creating and Maintaining Effective Environments for Student Learning: Group tables with accessible supplies. Have previously absent students get access to Google Classroom to catch up and provide additional instruction when time allows.
TPE 3: Understanding and Organizing Subject Matter for Student Learning: Slideshow of history and technique. Discuss images and identify various elements of art. Have table seats numbered with jobs for that number to do for the entire table.
TPE 4: Planning Instruction and Designing Learning Experiences for All Students: Start with slideshow of images and important history; names, dates, and definitions. Explain assignment and have class repeat instructions out loud when necessary. Formulate class time so each class session or lesson is lecture, sample, instruction, assignment/project, review.
TPE 5: Assessing Student Learning: Use exit ticket as Formative Assessment. Use the TAG (Tell, Ask, Give) method for constructive critiques. Provide a consistent way to turn in Summative Assessments and assignments.
TPE 6: Developing as a Professional Educator: Reflect and assess the amount of time teaching as well as the amount of time needed to complete the assignment. Look for easier ways to explain the art, the process, the project. Collaborate with other Art teachers. Work with Councilors and Aides when available.
TPE 7: Effective Literacy Instructions for All Students: Find ways to provide a foundation of knowledge prior to scaffolding the lesson. Academic discourse is used throughout the lesson. Syntax is used during discussion and lectures. Students will be supported by using correct vocabulary as the teacher when reiterating what a student has said.
TPE 7.1, TPE 7.2 By incorporating the sample assignment to be broad in topic students are given choice.
TPE 7.3 They lesson provides a variety of ways to engage; lecture, formative assessment, Brainstorming, Exit ticket, and technique practice.
TPE 7.4 foundational skills are developed through practical application of the technique learned.
TPE 7.5 developing literacy skills are found in practicing the vocabulary concepts as well as being introduce to them during lecture visually and verbally as well as written during their exit ticket.

Low Relief: Metal Embossing

Drawing that is 5x2.

Agenda for 1/26/26

1. 60 Seconds
2. Good Things
3. Today's Objective- Intro: Repousse and Chasing
   We will be creating our own sample 3"x3" practice piece. We can use shapes, stencils, OR borrowed images to enhance the format of this introductory project.

Unit Objective:

Radial Symmetry Embossing Project:

Emboss a metal sheet up to 9" x 9" to create radial symmetry. You may choose to do a circle or square.

60 Seconds

Good Things:

What is one thing that adds dimension or happiness into your life?

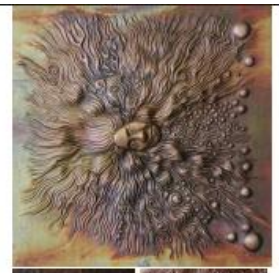
Metal Embossing Techniques

Repousse - Repoussé (french: to push) is a metalworking technique in which a malleable metal is shaped by pushing/hammering from the back side to create a design in low relief.

Chasing - Chasing (french: ciselure) is a similar technique in which the piece is hammered on the front side, sinking the metal.

Embossing - is using these techniques together which create relief and definition.

Relief refers to something protecting above the surface of the material, creating a tactile, three-dimensional texture. When embossing this technique is done through repousse and chasing.



Birds are a common theme in copper. There is a lot of room for creativity. Also, more dreamlike designs inspired from indigenous artists, give freedom to feel and ample room for the imagination.

Shape vs. Form

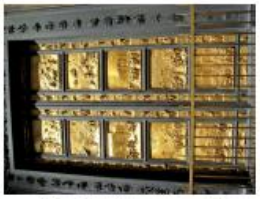
Shape, as it pertains to copper repousse:
It has height and width

Form, as it pertains to copper repousse:
It has height, width, and depth.

When a two dimensional SHAPE is pushed and raised, it becomes a three dimensional form.

Detail- Gates of Paradise, Ghiberti

Detail- Gates of Paradise, Ghiberti



The Baptistery in Florence, Italy is renowned for its three sets of spectacular bronze doors lavishly decorated with relief sculpture. Andrea Pisano created the first set of doors in the mid-14th century, and it was a very successful design. So successful, in fact, that Ghiberti spent 21 years (1401–1422) creating a pair of gilded bronze doors that depict scenes from Jesus's life.

—Indian Atlas Museum

The Gundestrup cauldron is a richly decorated silver vessel, thought to date from between 200 BC and 300 AD. It is one of most important surviving pieces of Celtic art. Although it was made between 150 BC and 1 BC, it is thought it within the Iron Age period or early Roman Iron Age.

Multiple and Single Subject Lesson Plan Template (Teaching/Co)

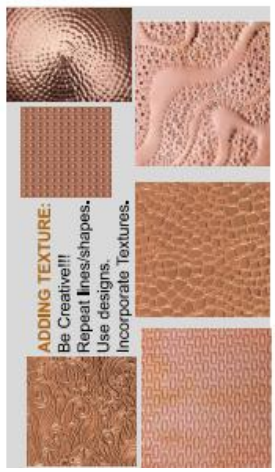
TEXTURE



Reminder:

You may use masking tape on the edges to eliminate cuts.
Demo for pressing and demo for tape.

Exit Ticket: Metal Embossing – Day 1

Name: _____**Period:**_____

Directions: Fill in the blanks using what you learned today about metal embossing.

1. Relief in metal embossing means the design is _____ above the surface of the metal.
2. Repoussé is the technique of pushing metal from the _____ side.
3. Chasing is the technique of hammering metal from the _____ side.
4. A shape has height and width, but a form has height, width, and _____.
5. When a two-dimensional shape is pushed out, it becomes a three-dimensional _____.
6. Why is it important to work on a soft surface when embossing metal?

Score:_____

Exit Ticket: Metal Embossing – Day 1
